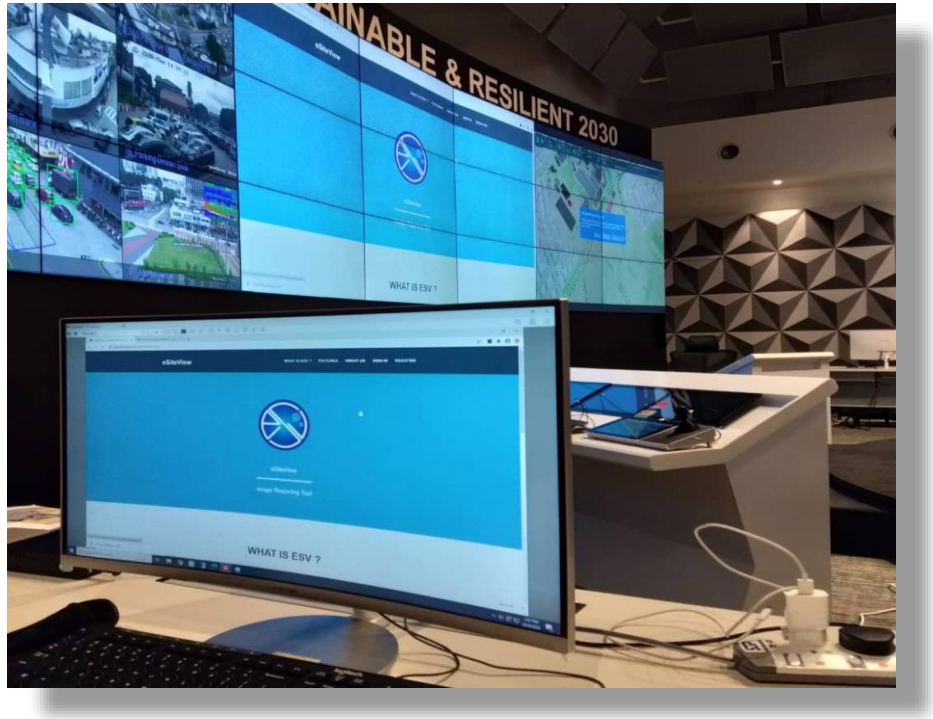
Enterprise Grade
Mobile Apps
eSiteView Task Reporting

INTRODUCTION

eSiteView (**eSV**) is an application systems tool for managing projects or specific site works information. The systems coordinate tasks and process real-time data & images of the executed tasks for instant work reporting and data analytics.

- Registered with Intellectual Property Corporation of Malaysia (CRLY00015542)
- Process real-time data and information for reporting and monitoring purposes
- Simple digital application for stakeholders; *project owners*, *planners* and *supervisors* to manage site work data and information



MANUAL PROJECT MANAGEMENT

WORKING IN SILOS

1 **PROJECT MANAGER**
Manual schedule development based on work order

2 **SITE SUPERVISOR**
Actual field works execution

3 **SITE SUPERVISOR**
Image capturing & information reporting

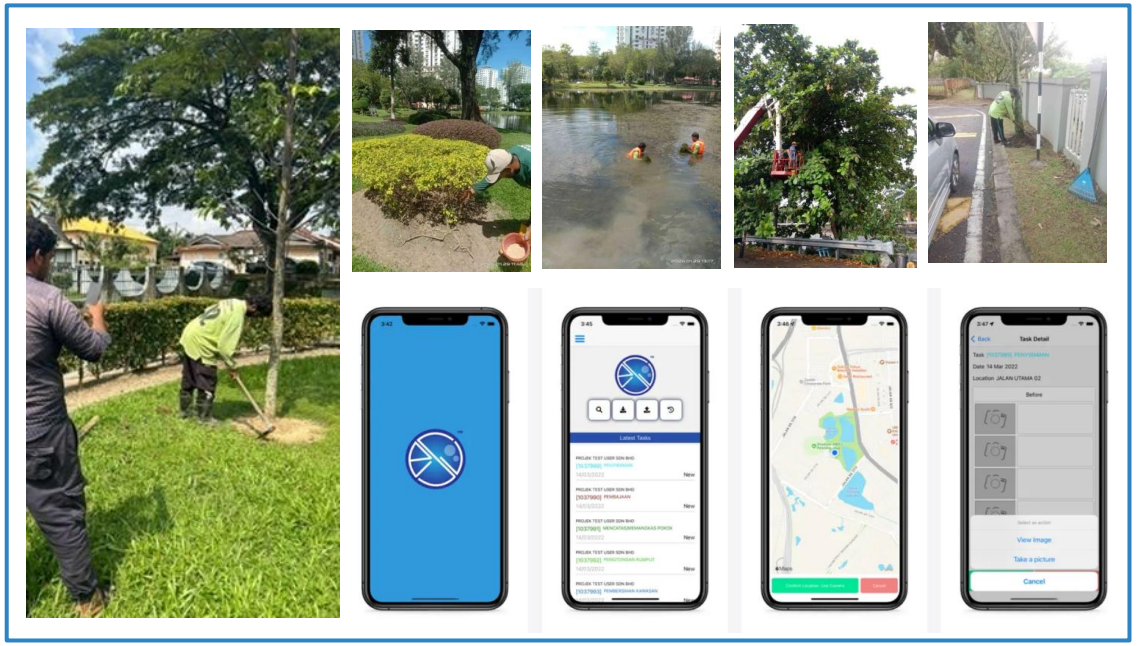
4 **ADMINISTRATOR**
Prepare progress report manually based on deliverables for payment claim

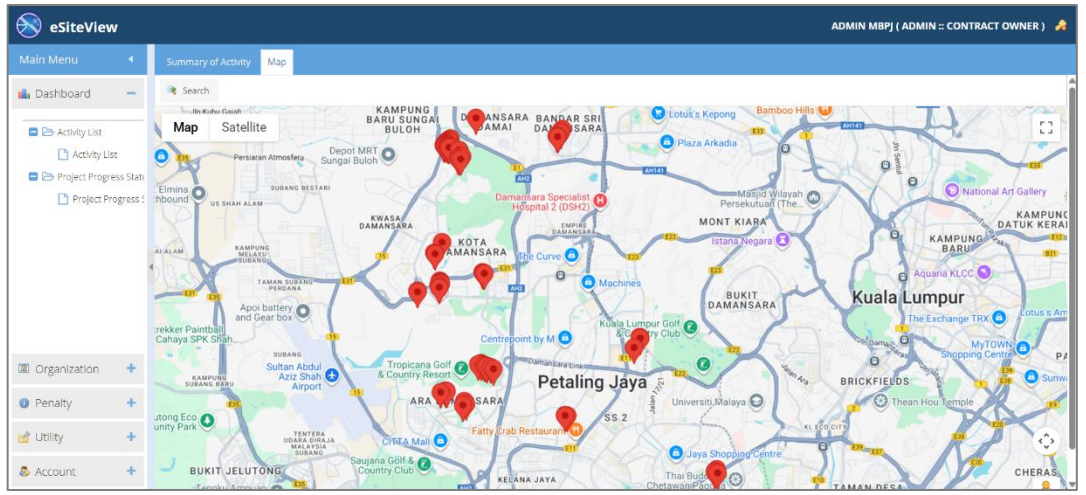
PROBLEMS WITH MANUAL PROCESS & WORKING IN SILOS

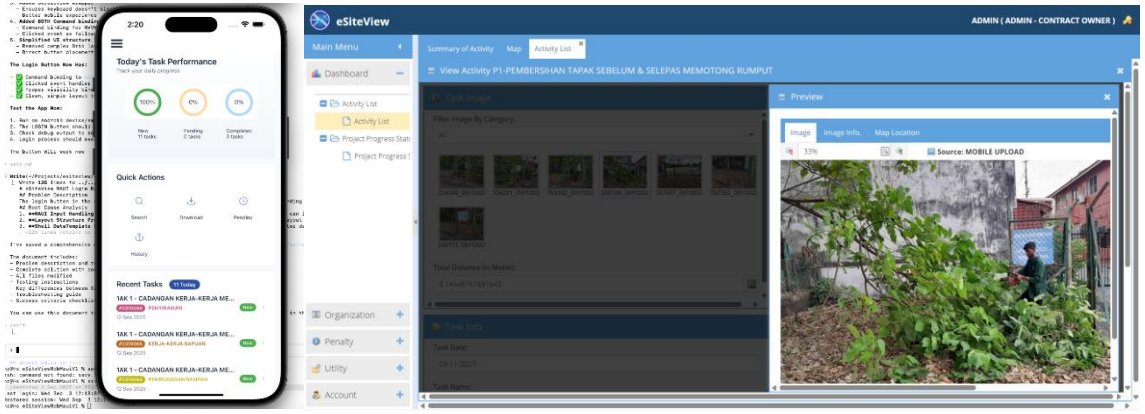
	Contract Owner / Governance Entity	Contractor / Company
1	Extensive manpower to monitor high volume of concurrent, on-going projects activities at different site work locations	Time consuming payment process because of manual information verification
2	Manual project reports consume large physical spaces for storage, and keep on increasing in size	Expose to penalty charge because of error, incomplete information or inaccurate data submission
3	Non systematic and inefficient site work monitoring and prone to miscommunication	Inefficient information delivery on project or site activity
4	No standardization in format for site reporting	Compromising on work productivity because of weak monitoring
5	Inaccurate information on site work executed because of human error or integrity issues	Questionable site work information submitted

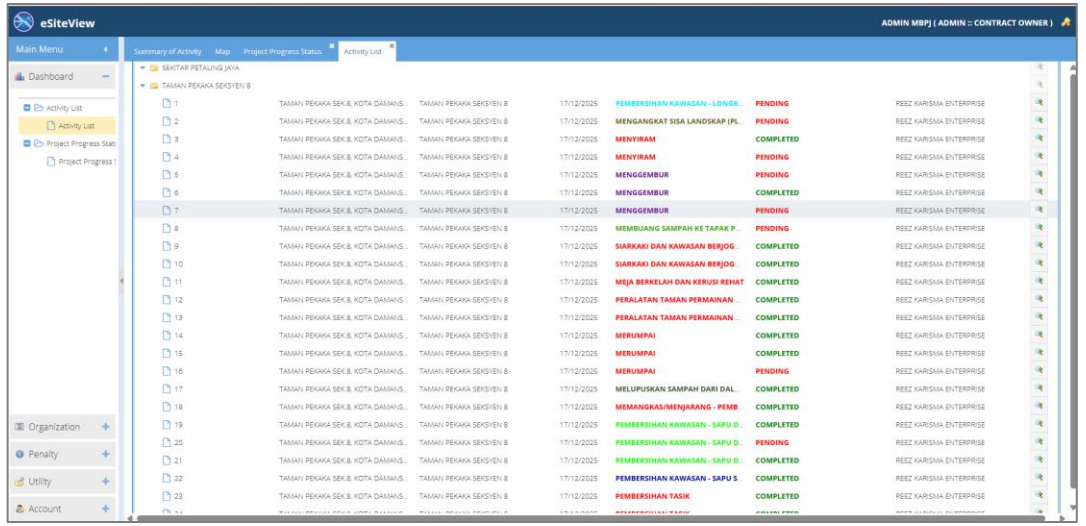
DIGITAL PROJECT MANAGEMENT

SITE WORKS DATA & WORK PROGRESS STORED IN SINGLE SOURCE

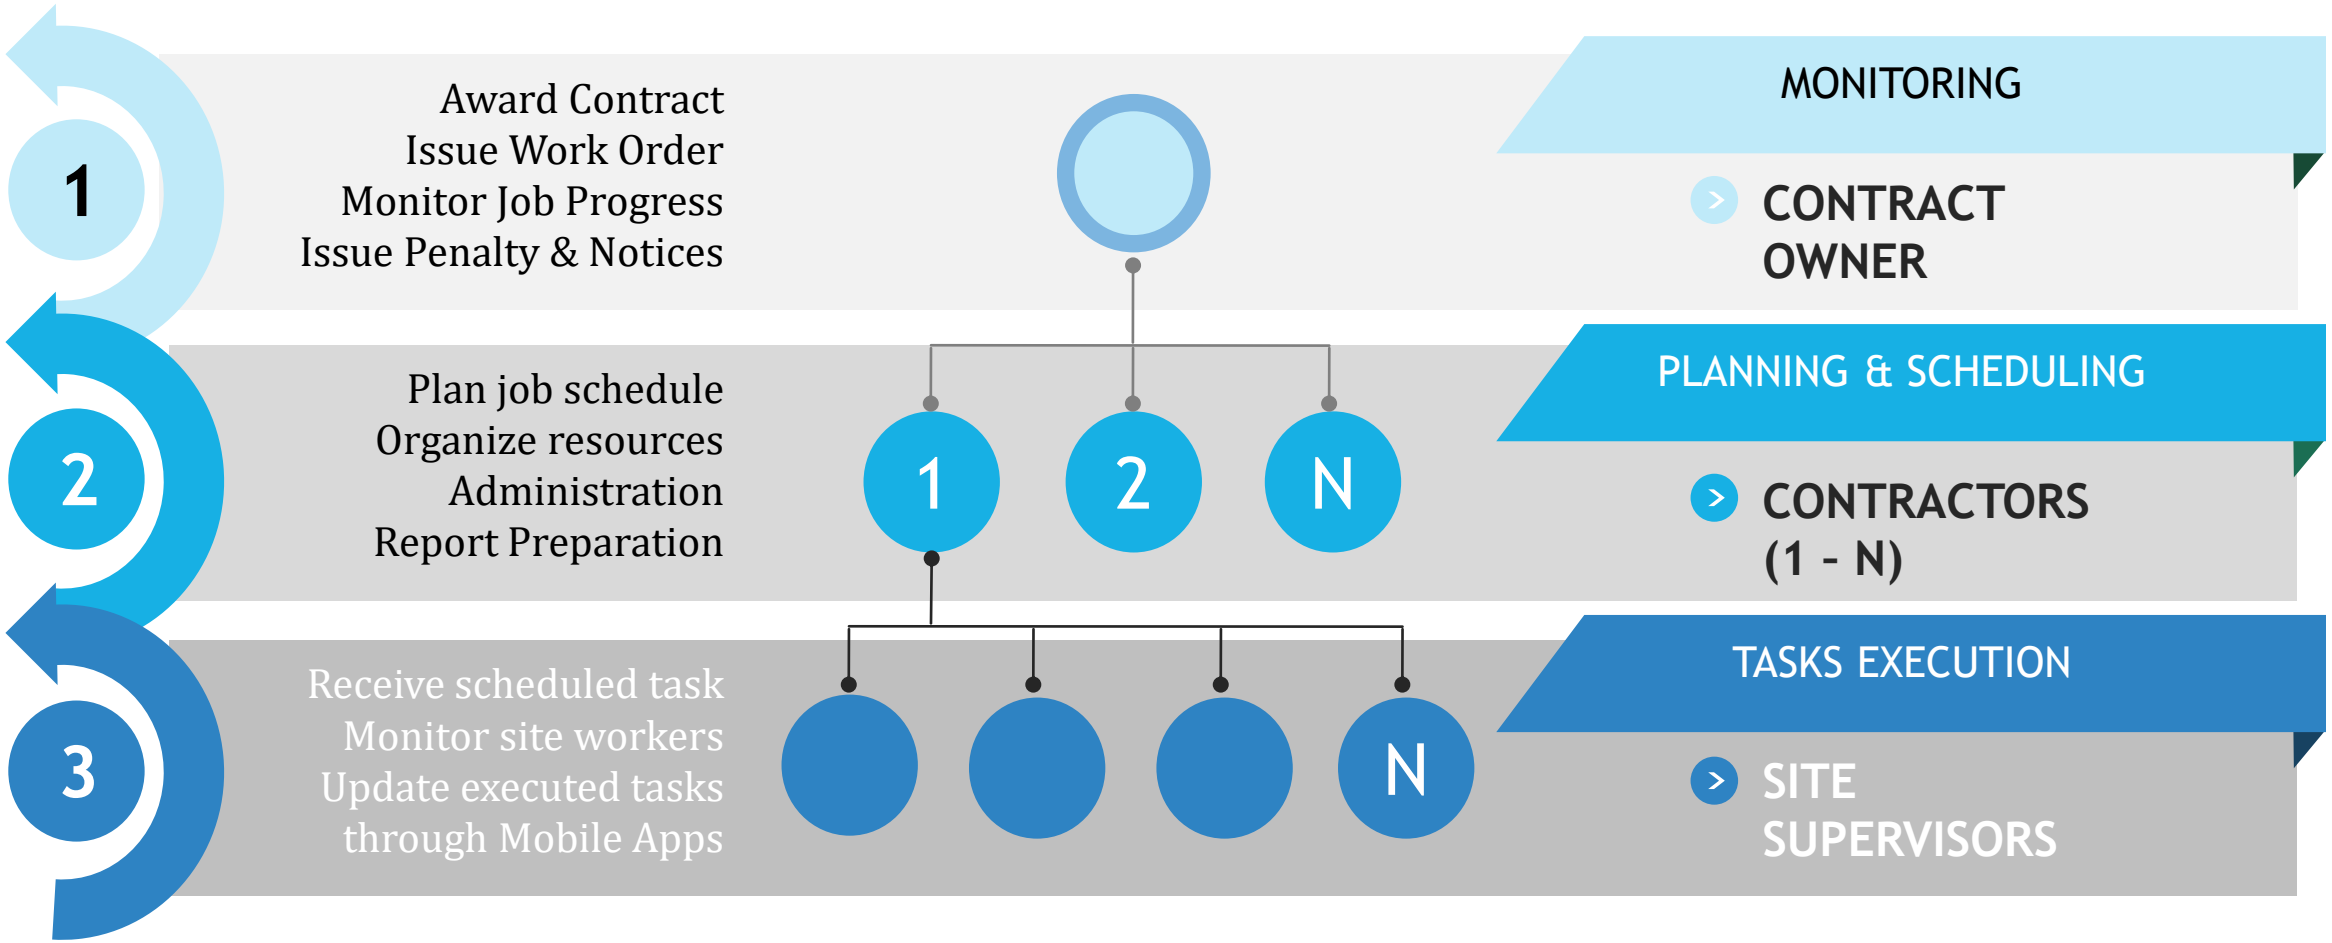






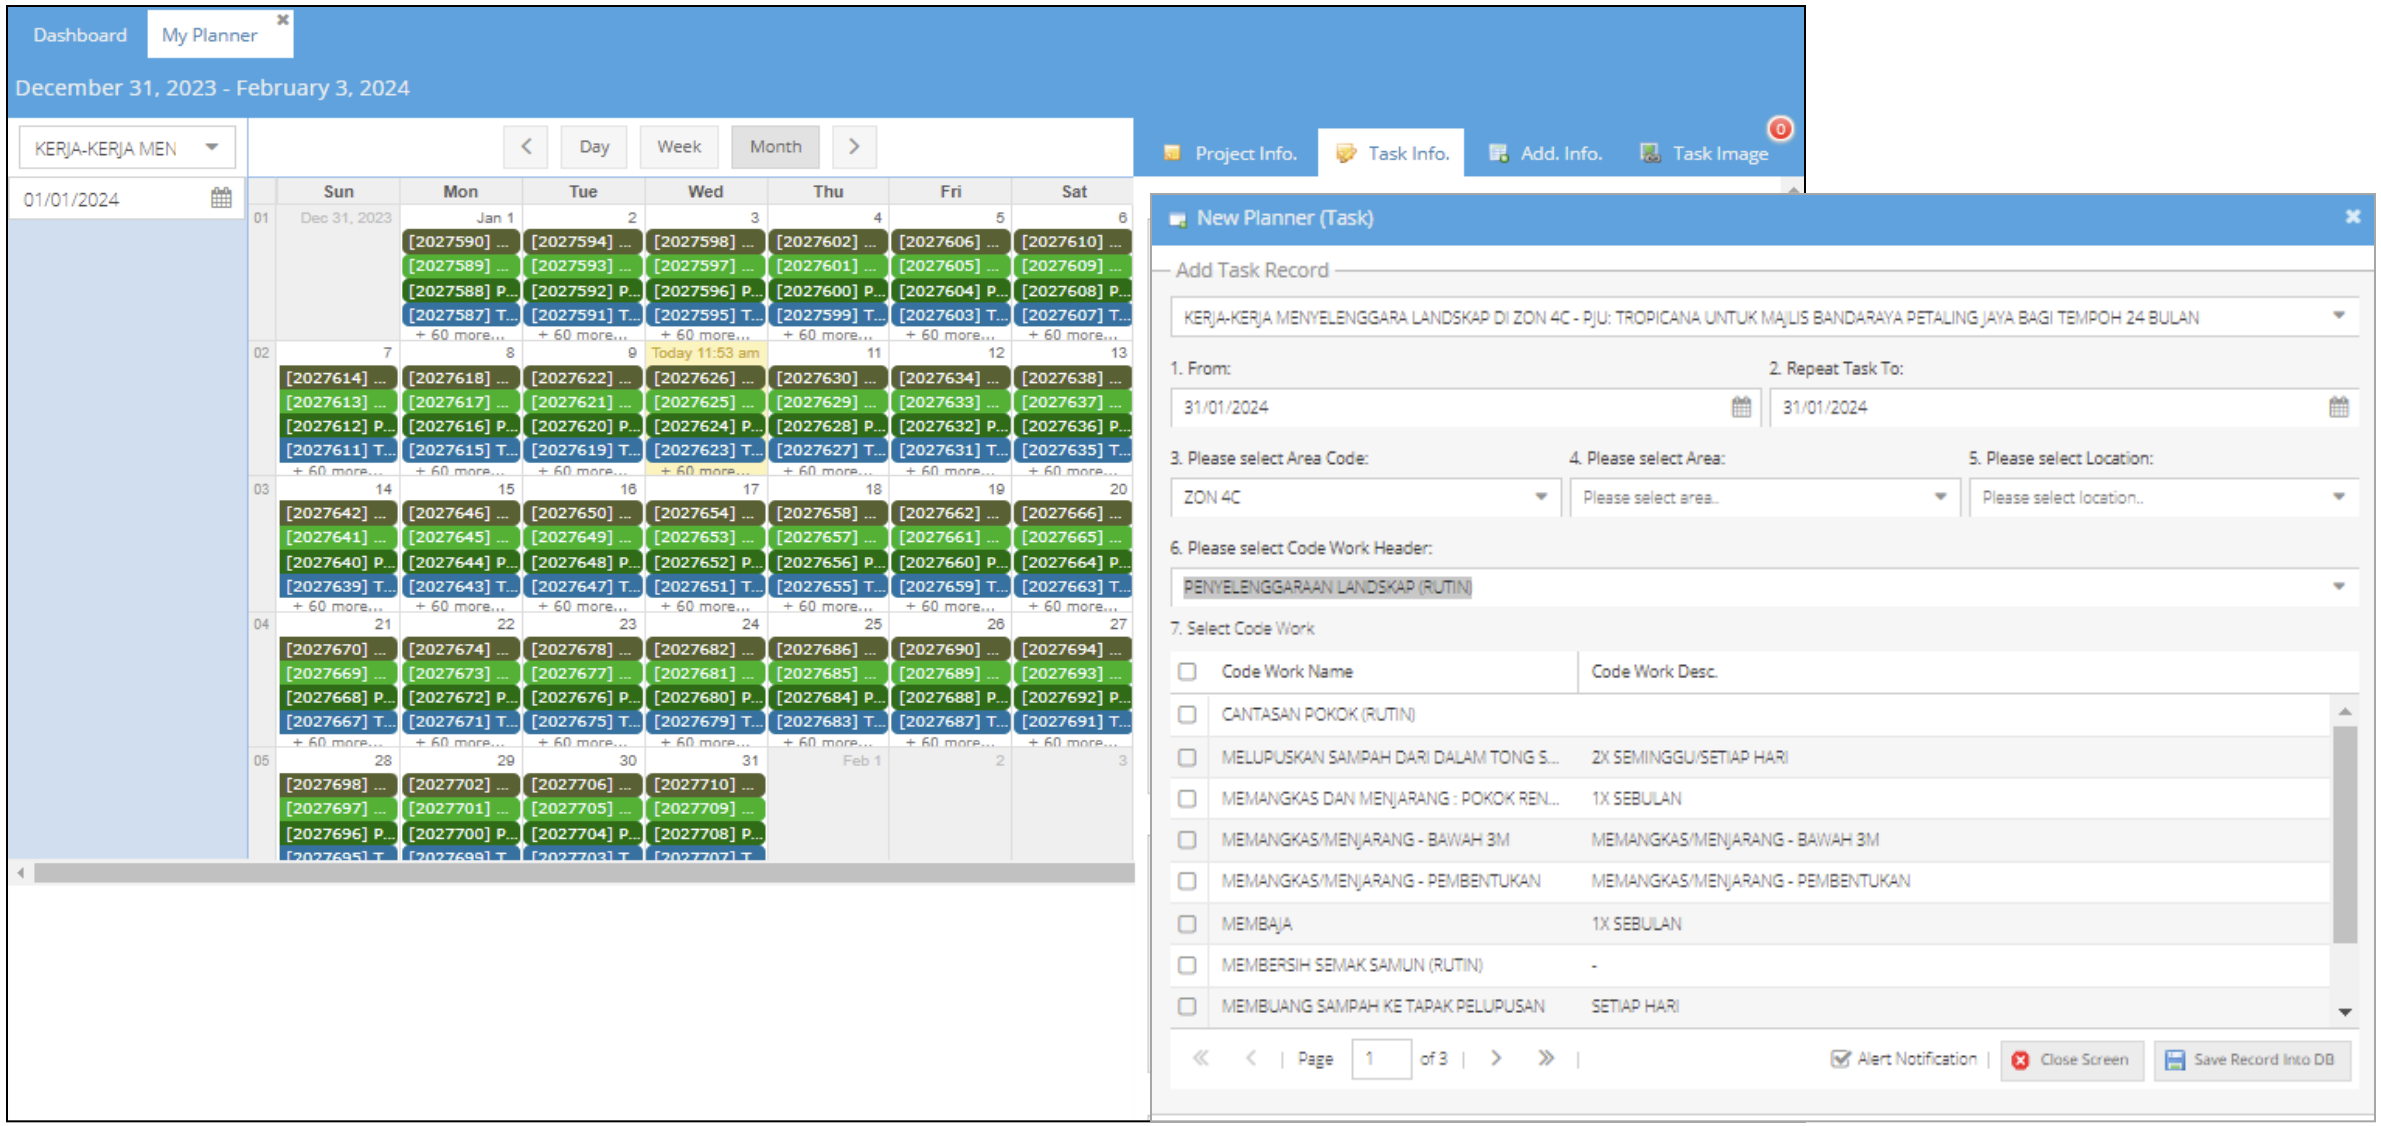


PROCESS STRUCTURE



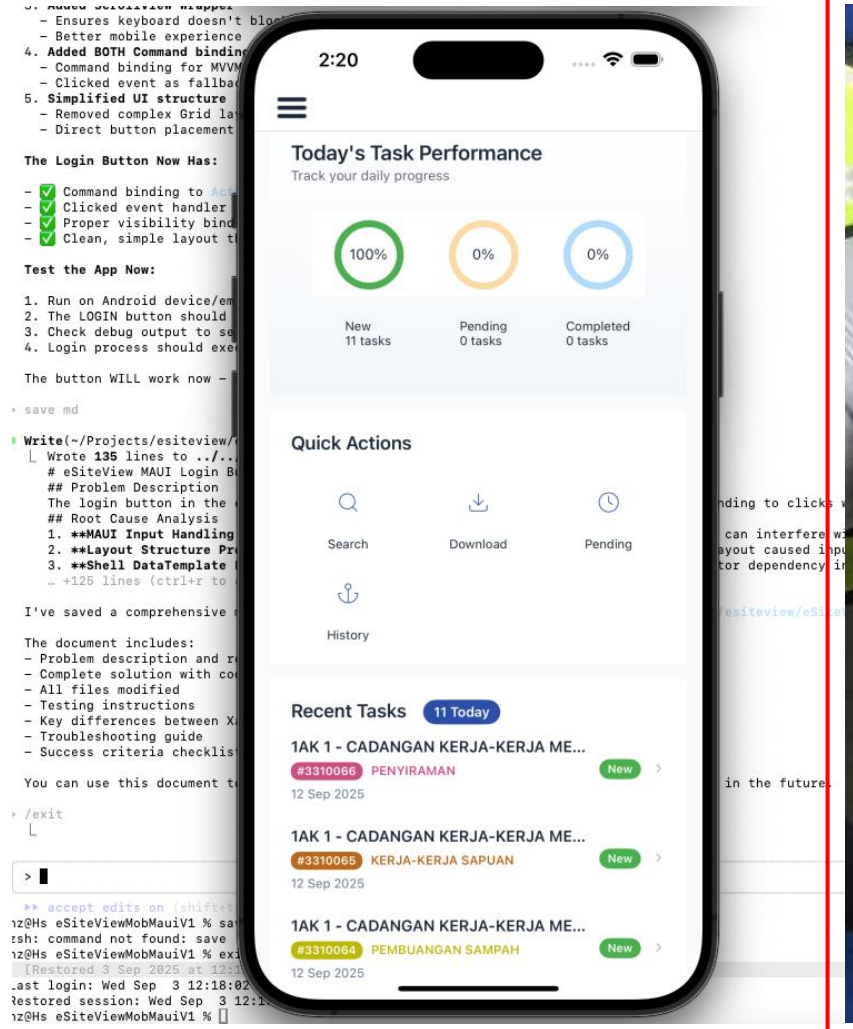
IMPLEMENTATION

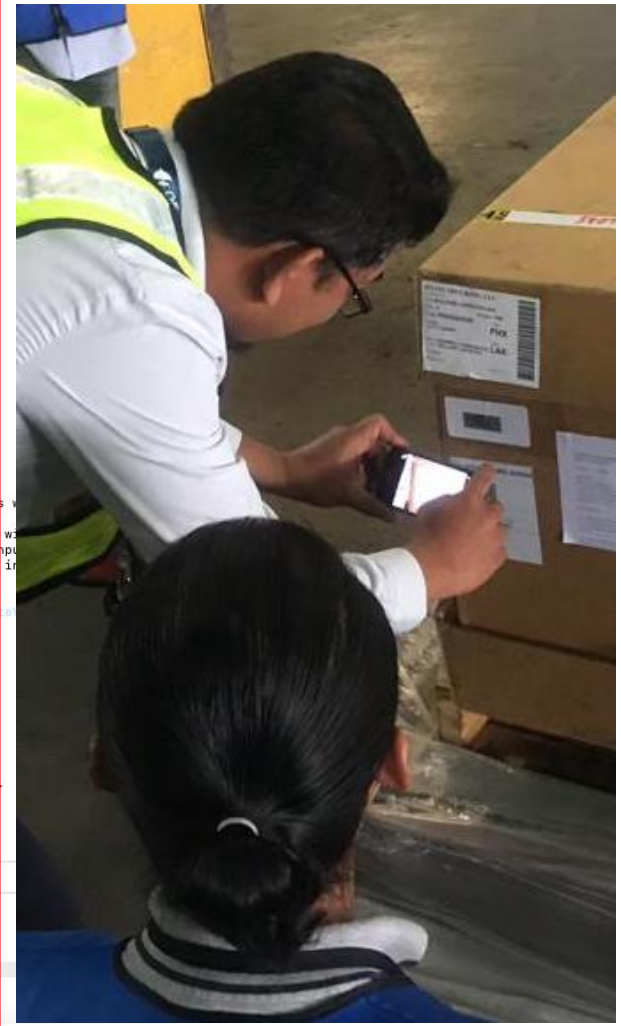
1. PARAMETERS SETTING & PROJECT PLANNING

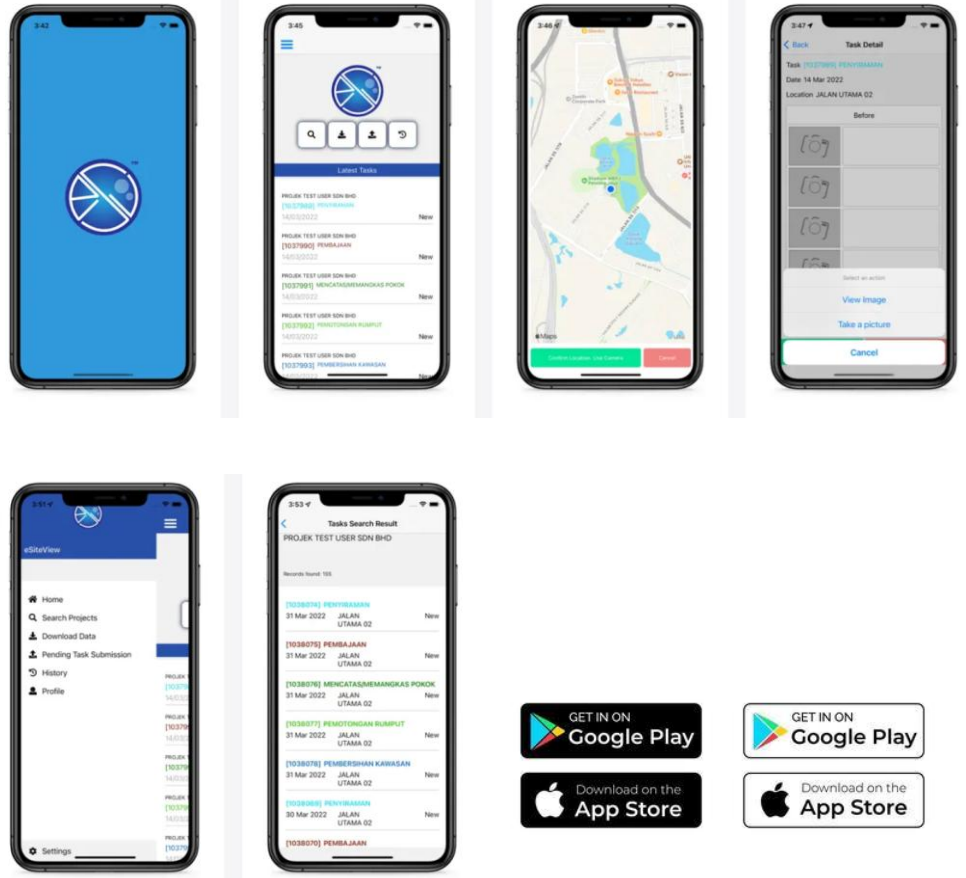


IMPLEMENTATION

2. SITE WORK EXECUTION USING APPS

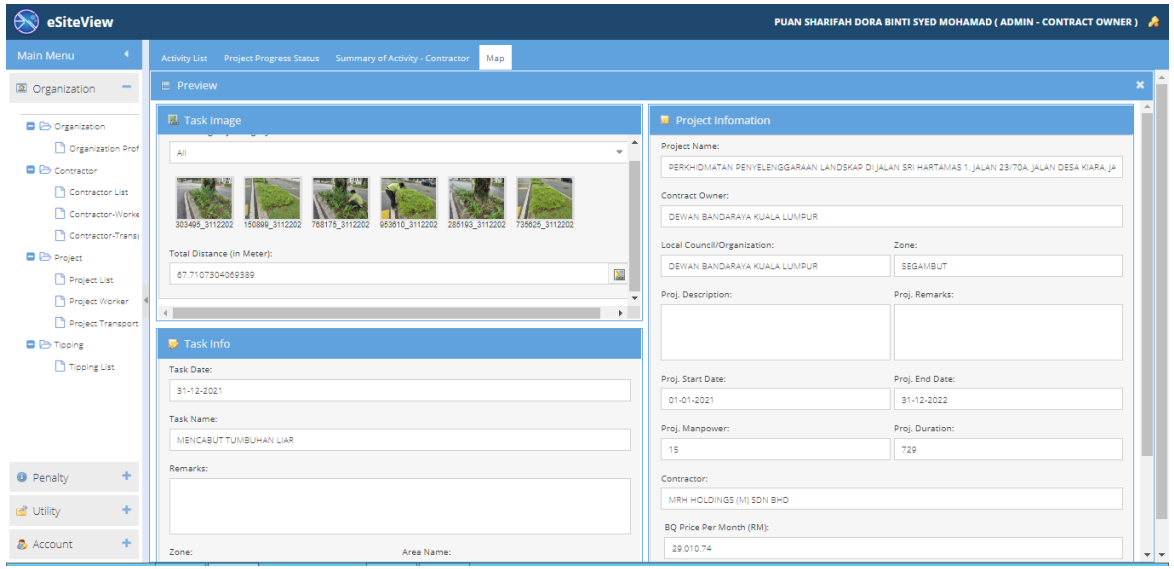


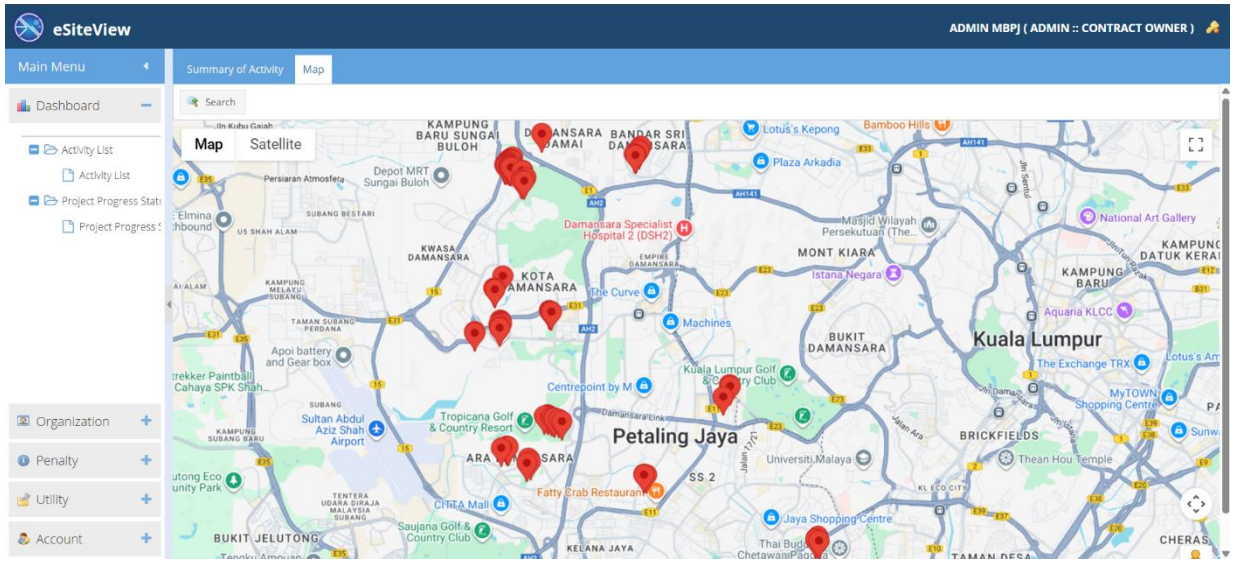


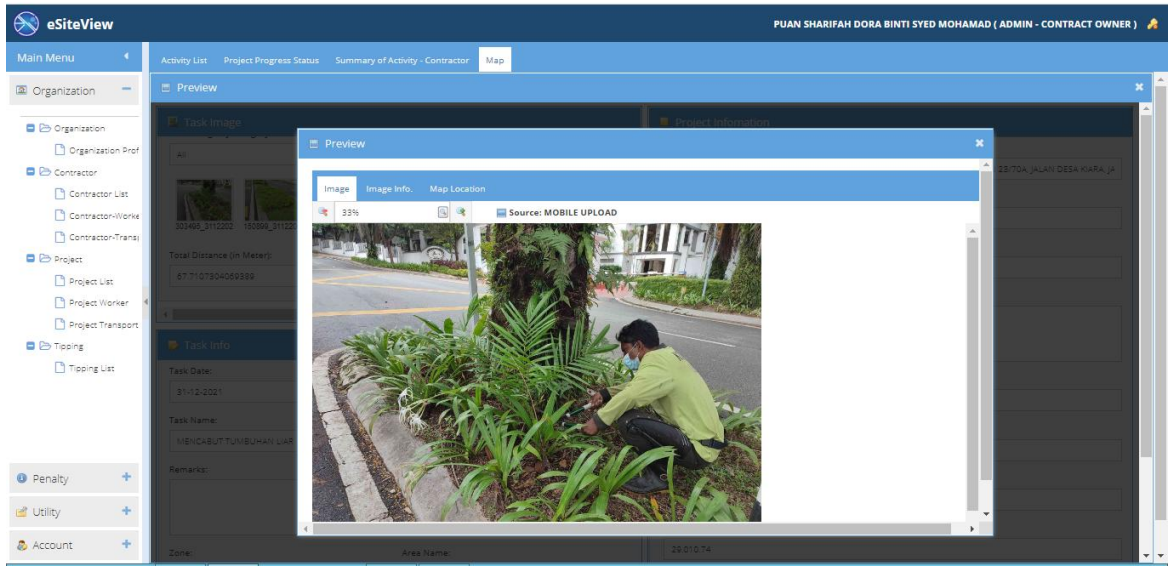


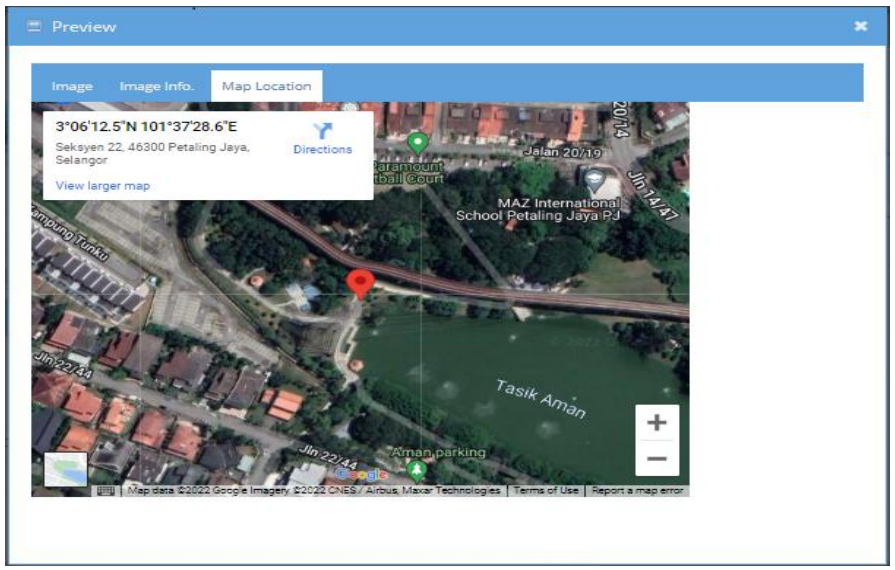
IMPLEMENTATION

3. ONLINE SITE WORK MONITORING



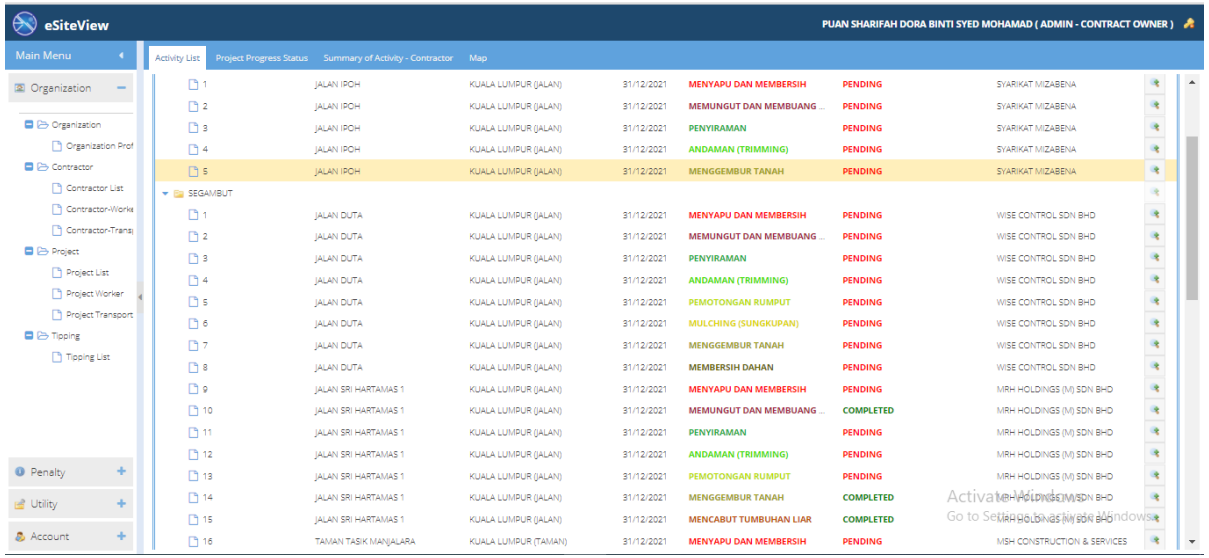


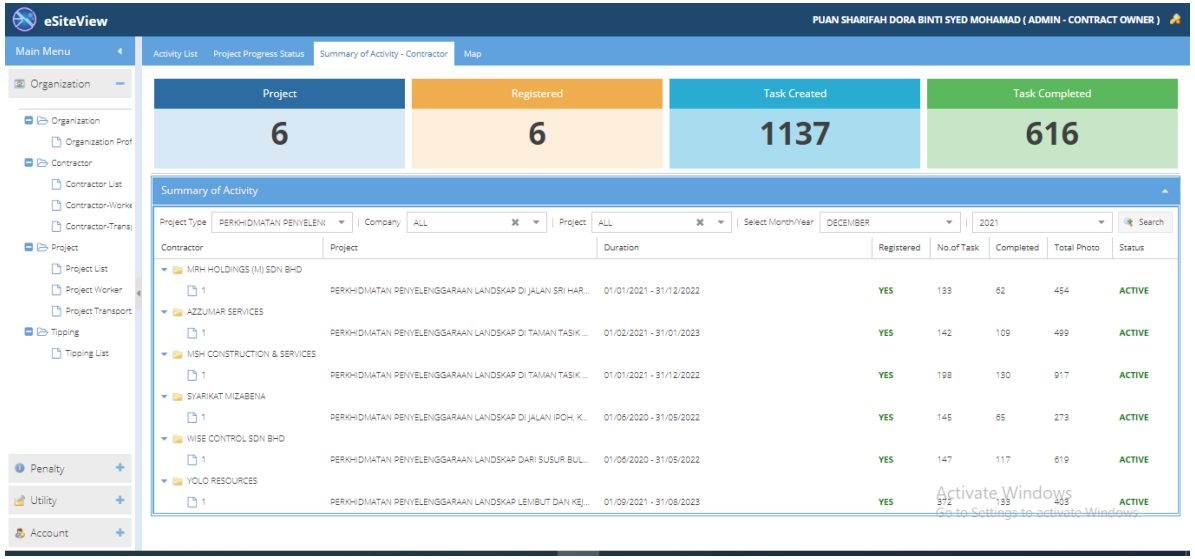


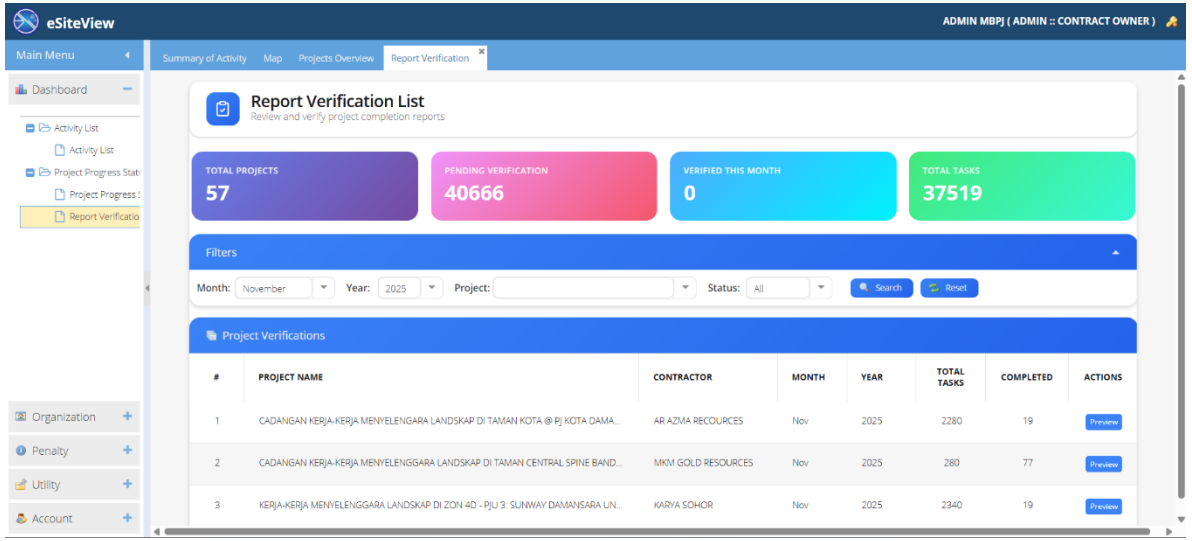


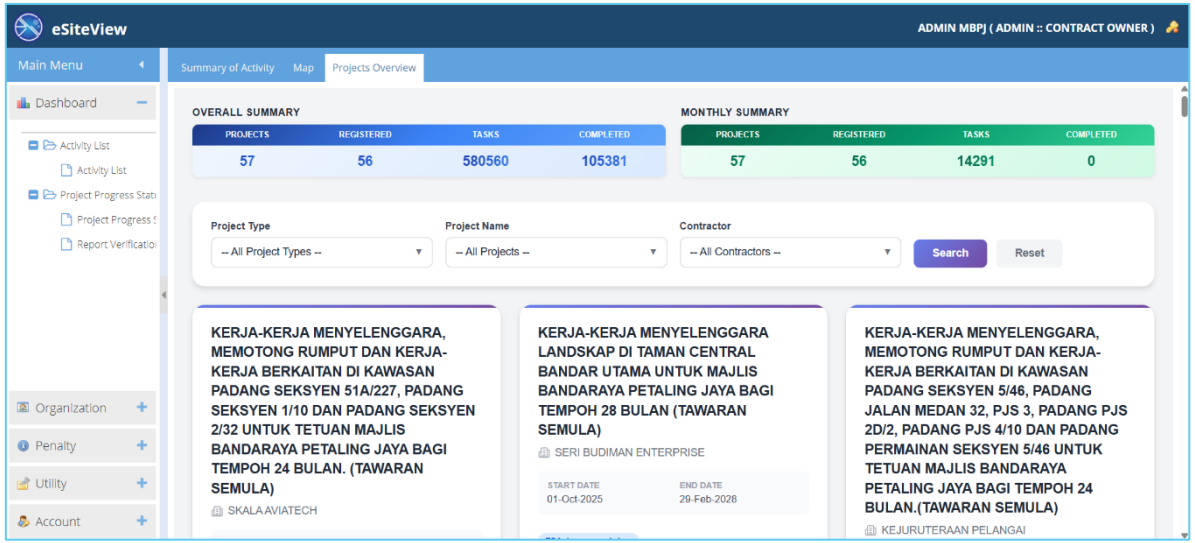
IMPLEMENTATION

4. DASHBOARD & BUSINESS INTELLIGENCE









IMPLEMENTATION

5. PROJECT REPORTING

A+ Performance!!

ADOPTION BENEFITS

CONTRACT OWNER

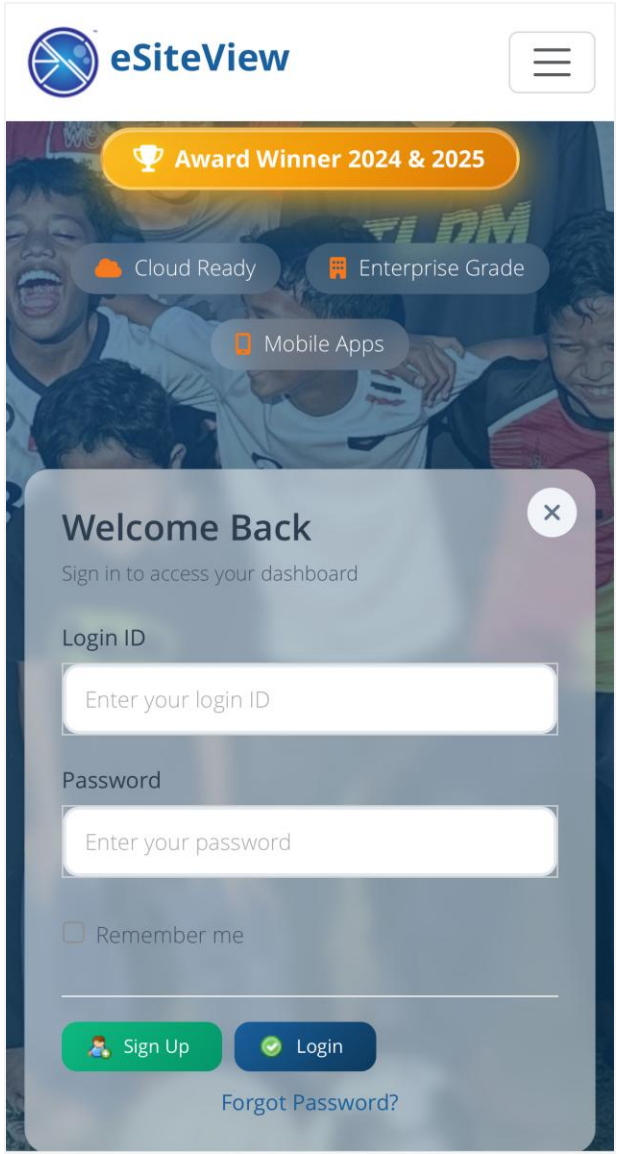
1 **ACURATE**
Accurate information received on executed task

2 **PRODUCTIVE**
Maximizing productivity and discipline on site

3 **SYSTEMATIC**
Systematic site work reporting verification process

4 **DYNAMIC**
Dynamic and simple technology with direct support from software developer

5 **FAST & EASY**
Fast information retrieval and payment verification process



CONTRACTOR / COMPANY

1 **PROFITABILITY**
Minimizing penalty charges on information submitted

2 **PRODUCTIVE**
Maximizing productivity and discipline on site

3 **COST SAVING**
Low monthly charge subscription-based application

4 **EFFICIENCY**
Fast, efficient and accurate site tasks information delivery

5 **FAST & EASY**
Fast report generation and easy-to-use application systems

QUALITY CONTROL

EXISTING SYSTEMS & PROCESSES

paperless workflow process

Scheduling → Work Assignment → Time-stamp & loc tag. → Remote monitoring → Instant site reporting → Project owner verification → Finance & payment verification

eSiteView Innovation

*Software Automation Readiness

*Increase measureable work quality and minimizing direct cost (paper, printing, storage space) can be achieved through holistic implementation in an organization or specific department

HIGHLIGHT: MBPJ SMART CITY

HIGHLIGHT: PUNB PROPERTY MANAGEMENT

UTILITY MANAGEMENT
Process parameters, business entities, logs, users management and directories

MEETING MANAGEMENT
Process flow management through formal meetings set via system for decision making & resolutions

PROPERTY ACQUISITION
Request management and verification, property evaluation process, legal documentations etc.

PROPERTY DISPOSAL
Process flow coordination for property disposal through selling etc

TENANCY MANAGEMENT
Tenancy process management for new property, renew, termination, variation process etc.

FINANCE MANAGEMENT
Payment gateway integration for collection purposes, billing, receivables and payable

MAINTENANCE MANAGEMENT
Integration with eSiteView Plus.
Manage property maintenance through dynamic scheduling and Apps

APPLICATION SCALABILITY

eSiteView IMPLEMENTATION ON VARIOUS FIELDS:

ENGINEERING WORKS

Monitoring and reporting services on engineering related works

ENVIRONTMENT & HEALTH

Monitoring and reporting services on landscaping works, environments audit and health inspection on public premises etc.

SOCIAL WORKS MANAGEMENT

Reporting management on social works related to specific entities such as villages, residential etc.

CLEANING & WASTE MANAGEMENT

Monitoring and reporting services on cleaning works, trash collection and waste management

MANPOWER MANAGEMENT

Monitoring services through site images reporting services

FARMING SCHEDULING

Scheduling and monitoring on farming related works

SPECIFIC EXPERTISE

01 Software Development Experience

More than 20 years of experience in development of infrastructure maintenance and management systems, *workflow* application and reporting services

02 Understanding on Related Process

Having associate companies with substantial knowledge on management of projects related to facilities maintenance, cleaning, engineering and landscaping works

03 Operation Management Experience

More than 5 years experience in eSiteView method's operation and stake holders management & communication, trainings and full implementation, from end-to-end.

SPECIFIC EXPERTISE

Awards & Recognition

Celebrating our achievements and milestones in innovation and excellence.
